Education

Pune Institute of Computer Technology

Jan 2022 – May 2025

Bachelor of Science in Computer Science

Score: 9.02 CGPA

Experience

Yardi Software

July 2025 - Present

Software Engineer

Pune, Maharashtra

- Work extensively with Yardi software, leveraging SQL to generate custom reports.
- Utilize SQL Profiler to track, analyze, and optimize query performance, improving reporting efficiency and accuracy.

DG-infosolution

Jan 2024 - April 2024

Web Developer Intern

Nashik, Maharashtra

- Developed and implemented user registration/login with validation, shopping cart management, checkout process, and admin dashboard using ReactJS, Tailwind CSS, and Firebase.
- Integrated a secure payment gateway with Razorpay and designed a responsive user interface for optimal performance across devices

Projects

AgroGuru – Smart Agriculture Website | *MERN Stack, Machine Learning*

- Engineered a full-stack agriculture platform using the MERN stack, delivering crop prediction, weather forecasting, agricultural news, and marketplace services for farmers.
- Integrated a Random Forest-based crop recommendation system to predict suitable crops using soil nutrients (NPK), temperature, humidity, pH, and rainfall data
- Built secure REST APIs with JWT authentication and implemented location-based services for laboratories, nurseries, and agricultural markets, improving resource accessibility for farmers.

PrepSmart | *Next.js, PostgreSQL, Express.js, Gemini AI, OpenCV, TensorFlow*

- Built an AI-powered interview preparation platform that generates personalized mock interviews, captures voice responses, and delivers Gemini-powered feedback
- Developed a computer vision pipeline using OpenCV, TensorFlow, and Keras to analyze facial emotions from webcam snapshots and provide confidence and engagement insights.
- Integrated speech-to-text processing, analytics dashboards, Clerk authentication, PostgreSQL, and REST APIs to track interview performance and technical assessment results

VenueVista | *React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS*

- Developed a full-stack accommodation booking web application using the MERN stack, enabling property listing management, accommodation search, and online reservation workflows.
- Implemented secure authentication using JWT, HTTP-only cookies, and bcrypt password hashing, ensuring protected user access and session management.
- Designed RESTful APIs, MongoDB schemas, and booking validation workflows for reservations, while implementing image uploads using Multer and a responsive React/Tailwind interface.

Technical Skills

Languages: Java, C++, HTML/CSS, JavaScript, SQL

Technologies/Frameworks: ReactJS, ExpressJS, NodeJS, Tailwind CSS, REST APIs.

Database: MySQL, MongoDB

Developer Productivity AI tools: Cursor AI, Claude Code

AI/ML: Google Gemini API, TensorFlow, OpenCV, Keras, Random Forest

Developer Tools: VS Code, Git/GitHub, Postman, Eclipse IDE, Figma
